» The stand and its parts are designed to be assambled with Apek monitors. Apek does not cover damage installed with other monitors.

» Do not install monitors with a larger weight than recommended.

» Do not repair the product yourself. Contact technical service for verification and repair.

» Use the package to store components and spare parts.

» Do not force the loose parts when assembling, the parts are designed to fit perfectly.

» Install the product in a flat and stable location.

» Periodically wipe the stand with a clean, slightly damp cloth (it is not advisable to use chemicals).

» Do not place or support cleaning products and/or substances on the support which may leak or damage the material.

» **Be careful when handling the monitor. Support for another pearson is necessary.**

» When supporting the monitor with the screen facing down, make sure the surface is adequate not to damage it.

» The assemble of parts that do not belong to the product is the sole responsibility of the buyer.

Environment ♻

Apek is a company that cares about the environment. We seek to develop products with the maximum of recyclable materials and with the least environmental impact. Dispose of materials properly.

Packaging materials such as cardboard boxes, bubble wrap, papers, EPS (expanded polystyrene), EPE (Expanded Polyethylene) and bags, are recyclable. Check the type of material for proper disposal in specialized recyclers.

Warranty

Apek warrants to the customer tha support and parts replacement for a period of 12 (twelve) months, considered from the date of issuance of the invoice of purchase, provided that it has been installed according to the guidelines described in the manual installation that comes with the product and only in the national territory.

» Apek guarantees the product against any defect of material or manufacturing process, since it's description fits into a production or bad funcitoning issue.

» The replacement of defective parts and maintenence from these services resulting from this warranty will be provided directly at the factory or in technical assistance accredited by Apek.

» On-site service.

» Addicional support, may be hired additionally. This service is not included in the factory warranty.

Warranty limitations

Warranty against manufacturing defects does not cover the following items:

» Installation or use of the product in disagreement with the recommendations in the installation manual.

» Damage caused by:
   - Inapropriate usage;
   - Overthowing and accidental actions;
   - Agents of nature;
   - Chemical agents;
   - Inappropriate applications, changes, modification or
repair performed by entities not authorized by Apek;
   - Removal and/or modification of serial number or
product identification;

» Use of the product with load (wight) above its capacity;

Remarks :

» Apek assumes no responsibility or liability for the persons or entities that may offer a warranty on its products.

» Expenses regarding and consequential from the installation of parts that do not belong to the product are the unique responsibility of the buyer.

» Apek reserves the right to change, technical and aesthetic characteristics of its products without prior notice.

» The warranty is valid only upon presentation of the invoice for the purchase of this product.

Correctly check the installation location for the stand to be placed in a masonry wall or in a wood panel that has adequate resistance.

Do not attach the stand to the drywall only, make sure the drywall is reinforced to withstand the indicated maximum load.

WALL MOUNT INSTALLATION
